

### **AMENDMENTS TO THE CLAIMS**

Please AMEND claims 1-7, 11, 16, 18, 19, 50-55, 60, 65, 67 and 68, and CANCEL claims 8-10, 12-15, 17, 56-59, 61-64 and 66 without prejudice or disclaimer, in accordance with the following.

1. (Currently Amended) A method for connecting a media player to a remote server, the method comprising:

~~processing~~checking a request for whether connecting to a remote server is required while reproducing data recorded on ~~an enhanced navigation~~a storage medium;

~~processing~~analyzing connection information recorded on the ~~enhanced navigation~~storage medium to determine whether a connection to the remote server is permitted, if the connecting to the remote server is required, the connection information comprising a list of servers to which the media player may or may not connect; and

determining whether to request the connection to the remote server, based on a result of the analyzing, ~~requesting and performing the~~ connection to the remote server, if the connection to the remote server is ~~permitted~~permitted, in accordance with the connection information.

2. (Currently Amended) The method of claim 1, wherein the connection information is ~~recorded~~included in a start-up file that is read prior to reproduction of the data recorded on the ~~enhanced navigation~~storage medium, and the method further comprises:

preloading the start-up file prior to the reproducing of the data recorded on the storage

medium.

3. (Currently Amended) The method of claim 2, wherein the start-up file comprises information associated with a list of additional contents to be loaded before the data recorded on the ~~enhanced navigation storage~~ medium is reproduced.

4. (Currently Amended) The method of claim 2, wherein the start-up file comprises at least one of information associated with a right to reproduce the data recorded on the ~~enhanced navigation storage~~ medium, information associated with a region code, information associated with a language of additional contents, information associated with memory management, and information associated with a file to be processed after the start-up file is processed.

5. (Currently Amended) The method of claim ~~[[2]]-1,~~ wherein the start-up file comprises information associated with a region code further comprising:  
receiving data from the remote server, if the connection to the remote server is performed.

6. (Currently Amended) The method of claim ~~[[2]]-5,~~ wherein ~~the start-up file comprises information associated with a language of the additional contents~~ the data received from the remote server includes a corresponding web page information.

7. (Currently Amended) The method of claim ~~[[2]]-6~~, ~~wherein the start-up file comprises information associated with memory management~~ further comprising:  
outputting the web page information.

8-10. (Cancelled)

11. (Currently Amended) The method of claim 1, wherein the data recorded on the ~~enhanced navigation~~storage medium comprises audio/video (A/V) data and/or additional contents associated with the A/V data, and the method further comprises:  
reproducing the A/V data and the additional contents in synchronization.

12-15. (Cancelled)

16. (Currently Amended) The method of claim ~~[[15]]-1~~, wherein the ~~walled-garden file~~connection information comprises information about at least one server to which the media player may or may not connect to retrieve additional contents associated with the data recorded on the ~~enhanced navigation~~storage medium.

17. (Cancelled)

18. (Currently Amended) The method of claim ~~[[15]]-1~~, wherein the connection information~~walled-garden file~~ comprises at least one entry associated with loading

information that controls access to information available on ~~the~~ at least one server.

19. (Currently Amended) The method of claim 18, wherein the loading information comprises at least a condition for loading the information available on the at least one server.

20. (Original) The method of claim 19, wherein the loading information comprises at least one of a language or a profile supported by the media player.

21-49. (Cancelled)

50. (Currently Amended) An apparatus for connecting a media player to a remote server, the apparatus comprising:

a signal processor;

a memory; and

a control unit configured to control the signal processor and the memory, the control unit configured to ~~cause the apparatus to~~

~~process~~check ~~a request for whether~~ connecting to a remote server is required while reproducing data recorded on ~~an enhanced navigation medium;~~ a storage medium,

~~process~~analyze connection information recorded on the ~~enhanced navigation medium~~storage medium to determine whether a connection to the remote server is permitted;  
if the connecting to the remote server is required, the connection information comprising a list

of servers to which the media player may or may not connect, and

request determine whether to request the connection to the remote server, based on the  
analyzed result, wherein the control unit is further configured to perform the connection to the  
remote server, if the connection to the remote server is permitted-permitted, in accordance with  
the connection information.

51. (Currently Amended) The apparatus of claim 50, wherein the connection  
information is ~~recorded~~ included in a start-up file that is read prior to reproduction of the data  
recorded on the ~~enhanced navigation~~ storage medium, and

the control unit is further configured to preload the start-up file prior to reproducing  
the data recorded on the storage medium.

52. (Currently Amended) The apparatus of claim 51, wherein the start-up file  
comprises information associated with a list of additional contents to be loaded before the data  
recorded on the ~~enhanced navigation~~ storage medium is reproduced.

53. (Currently Amended) The apparatus of claim 51, wherein the start-up file  
comprises at least one of information associated with a right to reproduce the data recorded on  
the ~~enhanced navigation~~ storage medium, information associated with a region code,  
information associated with a language of additional contents, information associated with  
memory management, and information associated with a file to be processed after the start-up  
file is processed.

54. (Currently Amended) The apparatus of claim ~~[[51]]~~50, wherein the control unit is further configured to receive data from the remote server, if the connection to the remote server is performed~~start-up file comprises information associated with a region code.~~

55. (Currently Amended) The apparatus of claim ~~[[51]]~~54, wherein the data received from the remote server includes a corresponding web page information, and the control unit is further configured to output the web page information~~the start-up file comprises information associated with a language of the additional contents.~~

56-59. (Cancelled)

60. (Currently Amended) The apparatus of claim 50, wherein the data recorded on the ~~enhanced navigation~~storage medium comprises audio/video (A/V) data and/or additional contents associated with the A/V data, and the control unit is further configured to reproduce the A/V data and the additional contents in synchronization.

61-64. (Cancelled)

65. (Currently Amended) The apparatus of claim ~~[[64]]~~50, wherein the connection information~~walled-garden~~ file comprises information about at least one server to which the media player may or may not connect to retrieve additional contents associated with

the data recorded on the ~~enhanced navigation~~storage medium.

66. (Cancelled)

67. (Currently Amended) The apparatus of claim ~~[[64]]~~50, wherein the ~~connection information~~walled-garden file comprises at least one entry associated with loading information that controls access to information available on ~~the~~ at least one server.

68. (Currently Amended) The apparatus of claim 67, wherein the loading information comprises at least a condition for loading the information available on the at least one server.

69. (Previously Presented) The apparatus of claim 68, wherein the loading information comprises at least one of a language or a profile supported by the media player.
